

# TOM SENIEL RAPLIZA

📍 Davao City, Davao Region, Philippines ✉ drunza22@gmail.com ☎ 09918955546

## SUMMARY

Motivated and adaptable professional with experience in customer service, backend onboarding, and technical support. Skilled in SQL, Networking, Python, C++, C#, CSS, Unity, Android Studio, and Visual Studio Code. Strong background in system setup, troubleshooting, and cross-team coordination, with additional experience in Java, React Native, and database management. Strong ability to learn quickly and perform effectively in fast-paced environments.

## EXPERIENCE

### IT Support (P.I.O)

**Eastern Mindanao Command**    **March 2026 - May 2026, Naval Station Felix Apolinario (NSFA), Panacan, Davao City**

- **Engineered a real-time news system chat** for the EMC-AFP platform, facilitating rapid, secure communication and intelligence sharing for the Public Information Office.
- **Integrated the chat application** seamlessly with broader news monitoring dashboards and data analytics to centralize command operations.
- **Built the full-stack solution** using React, Laravel, and Inertia.js, delivering a responsive and highly available system for daily IT and PR workflows.

### General Admin VA / Theft Investigator

**Panoptyc, INC.**

**July 2023 - January 2026, 2870 Peacetre Rd. NW #915-9271, Atlanta, GA**

- **Conducted targeted theft investigations** by analyzing surveillance footage and system data to identify security incidents and protect client assets.
- **Managed location camera onboarding workflows** using Google Sheets, accurately tracking technical deployment data to ensure seamless setup for new client sites.
- **Executed virtual assistant operations within the company CRM**, maintaining up-to-date client records, site logs, and administrative workflows to support daily operations.

### Data Annotator

**Remotasks**

**March 2021 - June 2023, San Francisco, California, US**

- **Executed high-precision 2D and 3D data annotation** on complex visual and spatial datasets, directly supporting the training and accuracy of machine learning and computer vision models.
- **Analyzed detailed imagery and 3D point clouds** to accurately identify, classify, and bound objects, ensuring strict adherence to project-specific quality guidelines.
- **Contributed to large-scale AI development workflows** by consistently processing high volumes of data and maintaining rigorous accuracy standards in a fast-paced remote environment.

### Computer Technical Support

**NAVAL ICT**

**January 2020 - February 2020**

**Station**

**, Kilometer 14, Naval Station Felix Apolinario, Panacan, Davao City**

- **Delivered responsive IT technical support**, actively troubleshooting hardware and software issues to ensure seamless daily operations for station personnel.
- **Executed physical hardware maintenance**, building and assembling computer systems while performing regular deep-cleaning to prevent thermal throttling and extend equipment lifespan.
- **Supported local network infrastructure**, assisting with hardware configuration, cable management, and connectivity troubleshooting to maintain secure and uninterrupted communications.
